

AI-ENABLED AUTO-TRADING

A Flourishing Mastermind, An
Artificial Intelligence Super Power.

Project Analysis

Introduction

With intensive research and development, we've curated a remarkable product like never before that incorporates AI and ML technology. This platform, with its advanced technology, automates trades on crypto pairs by retrieving both live and historical data to offer positive trade results.

Our algorithms have been shown to generate significant returns in the shortest time spans, providing 30% monthly returns on upward-trending markets and 5-10% monthly returns on bearish markets. It is customisable and takes real-time data from News (such as Twitter Feeds), ML analysed data from over 5+ years of trade history. All of this results in exceptional profits for trading, with a 92% positive trade rate.

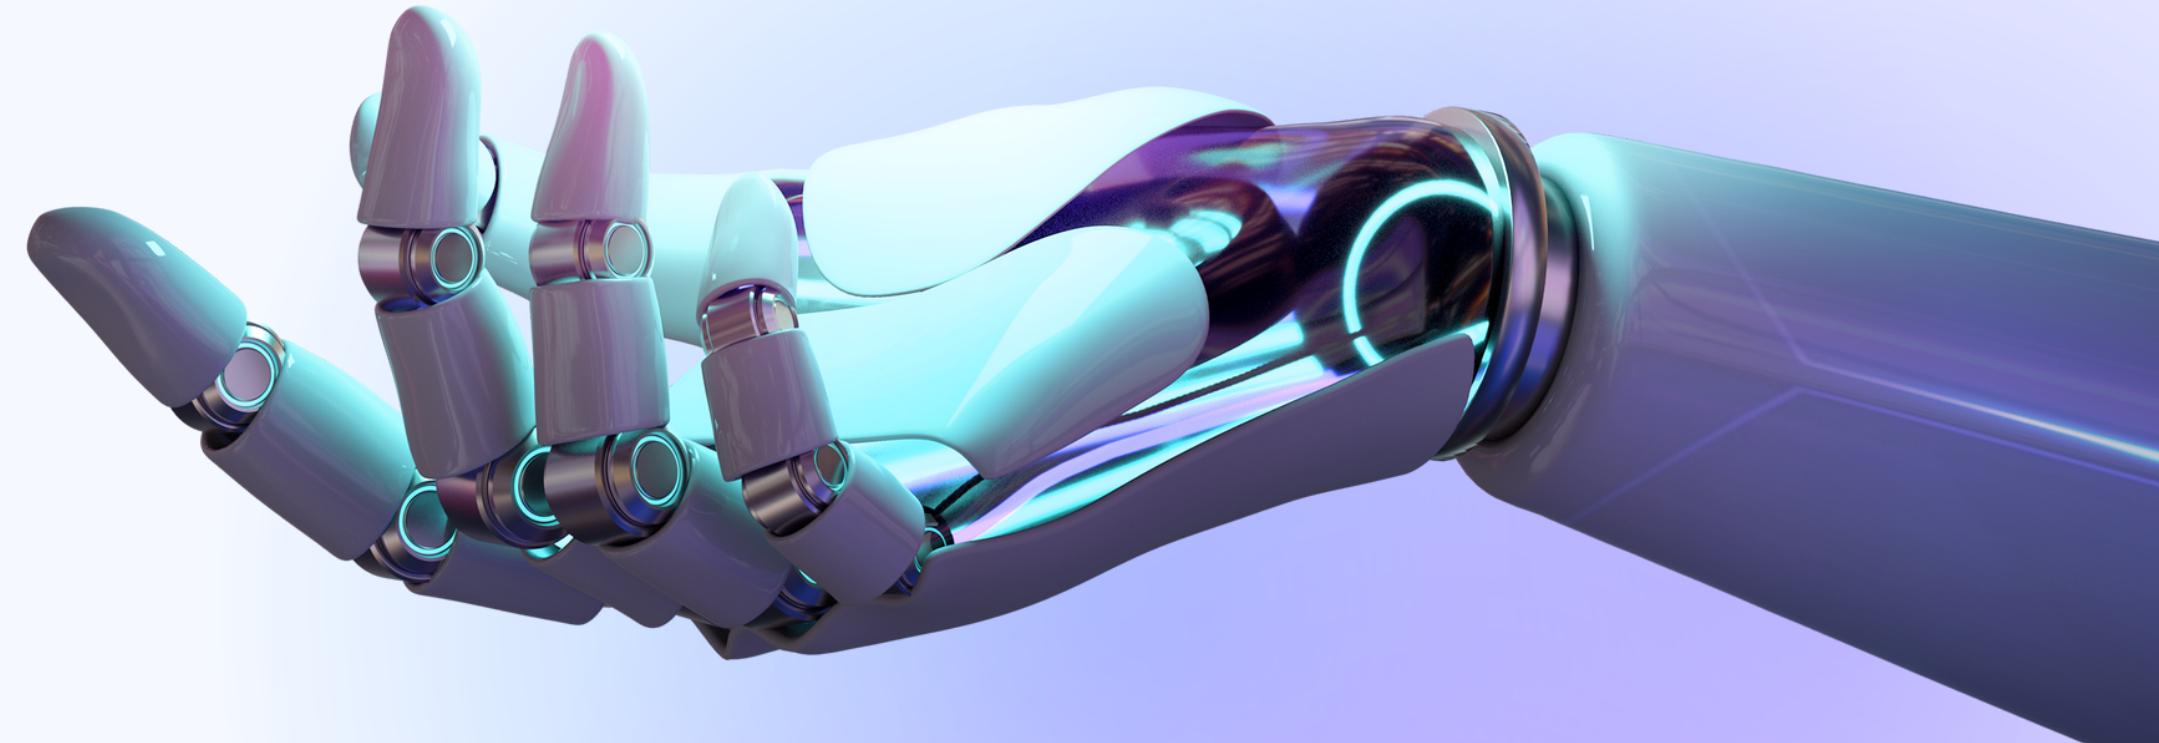

The Working of the System

This mastermind AI trading system is one-of-a-kind. This flourishing platform is based on the Moving Average Convergence/Divergence indicator, as well as other statistics. It contains a one-of-a-kind database that includes multiple analysed indicators in various timeframes.

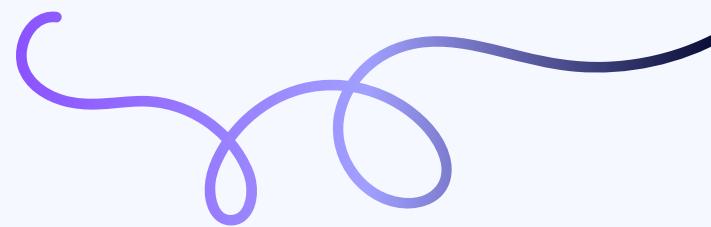

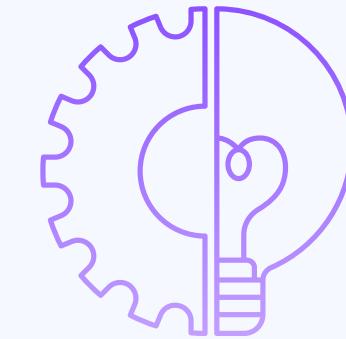

Why Database?

- Easy Filtering of coins across exchanges.
- Faster retrieval.
- Flexible with multiple conditions.
- Automatic Frequent Updates.

Here's a Sample Filtering:

```
filter = { "$and": [
  {'5m.macd_crossover': {"$eq": 1}},
  {'5m.stoch_up': {'$eq': 1}},
  {'1h.sma50': {"$lt": 'price'}}
]} ,
```

Enabling the AI

As the trading commences,
we have two sets of indications.

Indicator 1 - Trade Predictions

As the system starts trading live, it can predict trades of the next 15M, 1H, 2H, 6H, 12H, and 24H with its data automatically via Artificial Intelligence & Machine learning. Furthermore, the system has automated sub-settings that close the trades once the system receives a closing signal (exit_signal) or accomplishes the estimated ROI, making the system extremely favorable whilst trading.

Indicator 2 - Newsfeed Analysis

With its live market and news analysis methodology, this Mastermind takes Auto-Trading one step up the notch. This phase analyses real-time market news (through Twitter, for example) and provides a positive or negative indication to the system by scanning millions of news feeds (of the current trading pair) and providing signals.

Outcome 1 -

After the system receives both indications and if either one of these indications is positive, the system which is totally automated initiates the trade with its intensive data and understanding. The system is proven to procure 92% favourable trades.

Outcome 2 -

If both of the indications are negative, the system doesn't initiate current trade & pushes the trade to future trading to better understand the data and initiate the ideal trade. & pushes it to future trading options.

Ultimatum Performance

Here is an example of the system's performance over 5 days of real-time trading, when the system generated a total profit of 8.34% in just 5 days. A monthly return of roughly 50% and an annual return rate of 600%. Though on long-term data, the system can still procure 30% Monthly returns in a good market.

Profitable Trades in Need? AI Does the Deed!!

Over the course of two years, millions of data feeds were loaded into the AI system. This AI Enabled Auto Trading Mastermind is now finally more than ready to pounce on its next pathway. We are now marching forward with possible eager investors to further market and expand this flourishing trading platform to a worldwide level since AI is believed to only get better with time.

This system's current accuracy rate is approximately 92%, and it will only improve over time. With flawless trading statistics and even in a downward market, the strategy can guarantee 3X (300%) returns on any initial investment in or under 2 years.
